Contents

I Using the Forms Library **3**

1 Introduction **5**

2 Getting Started **7**

2.1 Naming Conventions . . . 7
2.2 Some Examples . . . 7
2.3 Programming Model . . . 11

3 Defining forms **13**

3.1 Starting and ending a form definition . . . 13
3.2 Boxes . . . 14
3.3 Text . . . 15
3.4 Buttons . . . 16
3.5 Sliders . . . 18
3.6 ValSliders . . . 18
3.7 Input fields . . . 19
3.8 Grouping objects . . . 20
3.9 Hiding and showing objects . . . 21
3.10 Deactivating, reactivating and triggering objects . . . 21
3.11 Changing attributes . . . 22
3.11.1 Color . . . 22
3.11.2 Bounding boxes . . . 25
3.11.3 Label attributes . . . 25
3.11.4 Redrawing objects . . . 29
3.11.5 Changing many attributes . . . 29
3.12 Symbols . . . 30
3.13 Adding and deleting objects . . . 32
3.14 Freeing objects . . . 32

4 Doing interaction **35**

4.1 Simple interaction . . . 41

4.2 Periodic events and non-blocking interaction . . . 42
4.3 Dealing with multiple windows . . . 44
4.4 Using callback functions . . . 48
4.5 Handling other input sources . . . 51

5 Free objects **53**
5.1 Free object . . . 53
5.2 An Example . . . 56

6 Goodies **67**
6.1 Messages and questions . . . 67
6.2 Command log . . . 71
6.3 Colormap . . . 73
6.4 File selector . . . 73

II The Form Designer **81**

7 Introduction **83**

8 Getting started **85**

9 Command line arguments **87**

10 Creating Forms **89**
10.1 Creating, changing and deleting forms . . . 89
10.2 Adding objects . . . 89
10.3 Selecting objects . . . 89
10.4 Moving and scaling . . . 90
10.5 Aligning objects . . . 90
10.6 Raising and lowering . . . 91
10.7 Setting attributes . . . 92
10.8 Generic Attributes . . . 92
10.8.1 Colors . . . 92
10.8.2 Object names and call-back routines . . . 92
10.9 Object Specific Attributes . . . 93
10.10 Cut, Copy and Paste . . . 93
10.11 Groups . . . 94
10.12 Hiding and showing . . . 94
10.13 Testing forms . . . 95

11 Saving and loading forms **97**

12 Language Filters **103**
12.1 External filters . . . 103
12.2 Command line arguments of the filter . . . 104

13 Generate hardcopies of the interface **105**

III An overview of all object classes **107**

14 Introduction **109**

15 Static objects **113**
15.1 Box . . . 113
15.2 Frame . . . 114
15.3 LabelFrame . . . 115
15.4 Text . . . 117
15.5 Bitmap . . . 118
15.6 Pixmap . . . 119
15.7 Clock . . . 122
15.8 Chart . . . 123

16 Button like objects **127**
16.1 Button . . . 127

17 Valuator objects **133**
17.1 Slider . . . 133
17.2 Scrollbars . . . 137
17.3 Dial . . . 140
17.4 Positioner . . . 142
17.5 Counter . . . 144

18 Input objects **149**
18.1 Input . . . 149

19 Choice objects **159**
19.1 Menu . . . 159
19.2 Choice . . . 163
19.3 Browser . . . 167

20 Container Objects **175**
20.1 Folders . . . 175
20.2 Menu Bar . . . 178

21 Other objects **181**
21.1 Timer 181
21.2 XYPlot 183
21.3 Pop-ups 192
21.4 Canvas 200

IV Designing your own object classes **209**

22 Introduction **211**

23 Global structure **213**
23.1 The routine `fl_add_NEW()` 214

24 Events **217**
24.1 Shortcuts 219

25 The type `FL_OBJECT` **221**

26 Drawing objects **227**

27 An example **239**

28 New buttons **243**

29 Using a pre-emptive handler **251**
29.1 The Pre-emptive and Post Object Handler 251

V Appendices **253**

A Overview of main routines **255**
A.1 Version Information 255
A.2 Initialization 255
A.3 Creating forms 262
A.4 Setting attributes 263
A.5 Doing interaction 268
A.6 Signals 272
A.7 Idle callbacks and timeouts 273

B Some Useful Functions **275**
B.1 Misc. Functions 275
B.2 Windowing Support 275
