

% xmaple

The screenshot shows the xmaple software interface. At the top is a menu bar with options: File, Edit, View, Insert, Format, Options, Window, and Help. Below the menu bar is a toolbar with various icons for file operations (open, save, print, copy, paste), navigation (undo, redo), and execution (run, stop, search, refresh). Below the toolbar is a status bar with icons for window management (close, maximize, minimize, help).

The main window is titled "Untitled (1) - [Server 1]". It contains a command prompt where the following command has been entered:

```
> taylor( exp(x) , x=0, 10 );
```

The output of the command is displayed in a large font:

$$1 + x + \frac{1}{2}x^2 + \frac{1}{6}x^3 + \frac{1}{24}x^4 + \frac{1}{120}x^5 + \frac{1}{720}x^6 + \frac{1}{5040}x^7 + \frac{1}{40320}x^8 + \frac{1}{362880}x^9 + O(x^{10})$$

The command prompt is ready for the next input, indicated by a "[>" prompt.

At the bottom right of the window, there are two status indicators: "Time: 0.0s" and "Bytes: 0.0K".
